

A Digital Investigator for Historical Newspapers

In this project, humanities researchers, computer scientists, and librarians work together on historical newspapers of three national libraries (Austria, Finland, France)

The NewsEye demonstrator (<https://platform.newseye.eu>) showcases the different outputs of the project. Its website, freely available, allows users to explore newspaper collections in different languages. Ranging from 1850 to 1950, these newspapers were made available by three National Libraries

of the project in Vienna, Paris and Helsinki. After searching through the collection, users can create personal collections to gather documents of interest. These collections can be exported in various formats or analysed directly inside the Demonstrator.
